ERINACINES

THESE ARE SOME OF THE ACTIVE INGREDIENTS OF LION'S MANE, WHICH ARE INVOLVED IN THE MYELINATION OF NEURONS, PROTECT AND RESTORE THEM, THEREBY IMPROVING THE TRANSMISSION OF ELECTRICAL AND CHEMICAL SIGNALS BETWEEN NERVE CELLS.

DURING THE LABORATORY STUDIES HAVE REVEALED THAT NEUROGENESIS (THE ABILITY OF THE BODY TO PRODUCE NEW NERVE CELLS) INCREASES SIGNIFICANTLY WHEN STIMULATED BY ERINACINS.

THANKS TO A GOOD PROTECTION OF NERVE CELLS FROM OXIDATIVE STRESS, THE CENTRAL NERVOUS SYSTEM BEGINS TO WORK MUCH MORE EFFICIENTLY, ALL OF WHICH CAN BENEFIT YOUR NERVOUS SYSTEM

CARBONIC ACID EXTRACT OF MYCELIUM LION'S MANE FROM NEWORGANIC

this is a revolutionary solution in the market of natural nootropic drugs.

Due to the high bioavailability of the extract, all active substances and nutrients are easily absorbed by our body within a few minutes through the oral mucosa. This makes it possible to take the extract at any time.

The biochemical composition of the extract contains important elements for our body:

ERINACINS 3.08%

**VITAMINS: A, E, K, D, B1, B6,
B5, B12, AMINO ACIDS AND FATS**

DOSAGE:

It is better to take the extract as part of microdosing.
The effect is cumulative.

The minimum course of admission is 60-90 days. If necessary, the reception can be continued throughout life, as an addition to the main diet.

We recommend starting with 3-6 drops a day, for 2 weeks, without skipping the reception. After 2 weeks, the dosage can be increased or decreased to achieve the desired result.

ADMINISTRATION:

Take the extract with a pipette, then place the number of drops under the tongue, hold for 60 seconds, then swallow.

It is better to take the extract in the morning, after waking up. The evening reception can cause problems with falling asleep.

If you still have questions, our experts will be happy to answer you.
